

# PondRegulator

The simple way to keep your pond healthy.

All ponds experience a build-up of organic solids and suspended solids which reduce water clarity and quality, and cause the biological filter to clog. Furthermore, excess fish food, leaves, dead algae and fish waste all contribute to a layer of sludge which, unless depleted, severely disrupts the ecosystem in your pond leading to health problems for your fish.

PondRegulator is a natural, scientifically formulated culture which safely cleanses and clarifies your pond. It maintains the stability of your biofilm, meaning your filters require less frequent cleaning. It also gets rid of the build-up of complex organic sludge and reduces free inorganic nutrients, to produce clear and healthy water.

## What else does PondRegulator do?

PondRegulator improves and stabilizes the dissolved oxygen (DO) concentration within the pond, vital for maintaining the health of your fish.

It depletes the bacteria in sludge that produce noxious gasses, which not only smell bad but can be toxic to fish.

It helps reduce surface foaming, preventing unsightly staining and the formation of brown scum on the pond surface.

PondRegulator even slows down the build-up of organic waste. It stabilises a new pond, minimizing the load on new filters and reducing the risk of your fish being poisoned by toxins.

## Instructions for Use

- To balance pond conditions  
One dose per week until the pond condition is restored, at a rate of 20 ml per 1,000 litres of pond water.

- After restoration, dose monthly at a rate of 20 ml per 1,000 litres of pond water.
- How to dose your pond  
Shake bottle before use. Dilute the correct quantity of PondRegulator into a clean vessel containing 10 litres of pond water. Pour the liquid around the pond as evenly as possible.

Note: Adequate aeration is necessary for optimum performance.

## Quality Standards & Safety QA/QC

- The cultures used in PondRegulator are completely safe for fish and plants.
- All EcoPure products are certified by an independent standards laboratory.
- More than one EcoPure Pond System treatment can be used at the same time.

## Health & Safety

- Do not ingest. Avoid contact with open wounds. Wash contacted skin with soap and water. If splashed in eyes, wash with water for 10 minutes.

Caution: Keep out of reach of children.

## Storage

- Store in a cool dark place (1- 25°C - best stored at 4°C).
- Use within 3 months after opening.

## Treatment Capacity

- 1 Litre of PondRegulator treats
  - c50,000 Litres
  - c11,000 Gallons

## Product Range

- PondRegulator is available in a 1 Litre size.
