

UltraSieve® MIDI

The smaller version of the successful UltraSieve III is here!

The perfect solution for pump capacities up to $\pm 12\text{m}^3/\text{h}$.
The most ideal pre-filter! Create a compact filter system by combining the UltraSieve MIDI with a beadfilter or other pump fed filters.

The pump connection comes with a long suction pipe which draws the water from under the float to prevent air suction.

- 110mm inlet
- Patented flow regulation
- Strong polypropylene house
- Improved edges around sieve
- **Max. flow of ± 12.000 l/h**
- **waste outlet, 2" male threaded**
- **Very compact size (L x W x H)**
27 x 56 x 74cm
- Screen **300 micron**
- Optional lid available
- Pump outlet 2" male threaded,
incl. 2" solvent fitting
